

PRESCHOOL

JULY 2016

In the month of July we explored the outdoors while playing soccer and walking through our community. We continued to learn about growing plants and what they need to grow.. Recently, we began to notice the temperature outside and worked together to plan fun activities to beat the heat. Our favorites include water play and trips to the park!

AUGUST 2016

In August we plan to continue our adventure in learning outside and loving everything summer has to offer. We hope to explore fun activities that are perfect for hot sunny days and trying new recipes like homemade lemonade, fruit popsicles day trips to the splash pad! These activities will keep us cool while fostering our love of mixing ingredients and trying new recipes.
